Professional Summary

Result-driven Team Lead with 9+ years of experience leading software development, data analytics, and AI/ML initiatives across BFSI and tech sectors. Proven ability to lead cross-functional teams, deliver complex projects, and drive business outcomes. Strong background in backend systems, BI, automation, and client engagement. M.Tech. in Computer Science from **IIT Kharagpur**. **PMP** certified.

Work Experience

Programmer Intermediate Analyst, Citigroup

Duration: July 2022 – Present

- Improved order lifecycle performance by **30–40%** through backend modernization in Citi Equity Trading systems.
- Reduced production latency diagnosis time by **50%+** by leading Python-based automation for performance bottleneck analysis.
- Accelerated release cycles by **25%** by migrating on-premise deployments to **OpenShift pod-based services** and enforcing Agile sprint delivery across a **4-member team**
- Developed and integrated a **machine learning model** to predict the **probability of trade orders passing validation and execution checks** in Citi's equity trading system, improving pre-trade decision accuracy by **35%** and reducing failed or rejected orders by **20%**

Lead Software Engineer, Persistent System

Duration: July 2016– July 2022

- Managed BI development for **6+** enterprise clients including Microsoft and Empirix.
- Delivered Microsoft IPCosell BI solution managing **\$1B+** pipeline – end-to-end architecture, ETL, reporting and saved manual effort by **90%**.
- Led ML/NLP-based fraud detection & sales prediction features, increasing operational efficiency.
- Acted as key liaison between technical teams and business stakeholders across global locations.

Education

Master of Technology (M.Tech.) - Computer Science 2020 - 2022
Indian Institute of Technology, Kharagpur (IIT KGP)
Grade : 8.35/10

Bachelor of Technology (B. Tech.) - Computer Science 2012 - 2016
Vishwakarma Institute of Technology, Pune (VIT Pune)
Grade : 8.2/10

Certificate

Project Management Professional (PMP) - Valid till Sep 2028

Skills

Backend: Java, Spring Boot, REST, Kafka

Cloud & DevOps: AWS, Docker, OpenShift, Kubernetes, Jenkins, Microservices Architecture

Data & BI: SQL, ETL, BI, Data Structures & Algorithms

AI/ML: Machine Learning, Deep Learning, NLP, RAG, TensorFlow, LLMs

Practices: Agile, Scrum, CI/CD

Selected Engineering & AI Project

Stock-Exchange-Simulation : Stock exchange simulation on which four stocks will be traded and trade settlement is done using priority Queue. Technology used: Java Microservices, Spring Boot, Kafka, Docker, Angular.

Enterprise-Grade RAG Platform for Financial Data (SEC 10-K) : This project builds an end-to-end Retrieval-Augmented Generation (RAG) system for querying SEC 10-K filings. It uses FAISS for vector search, Cross-Encoder reranking, and a local LLM (Ollama) for answer generation with citations

LLM-driven autonomous SQL analytics system using FastAPI and Ollama : The user sends a natural-language task to the API. A planner agent (LLM) breaks it into steps and a SQL agent (LLM) generates a query. A verification agent (LLM) checks/fixes the SQL, then the system executes (with retry) it on the database. The results are summarized into a report, and every step is logged and returned as a trace.
